

Santhanam K

Senior Android Engineer · Kotlin · Jetpack Compose · KMP

Senior Android engineer with 7+ years shipping production mobile apps across VPN, mobile security, banking, healthcare, and marketplace domains. Deep expertise in Kotlin, Jetpack Compose, Compose Multiplatform, Kotlin Multiplatform (KMP), MVVM/Clean Architecture, Coroutines, Flow, Hilt, and Retrofit. Proven track record supporting apps with 10M+ downloads, driving crash-free improvements, and reducing release cycles through AI-assisted engineering, modularization, and CI/CD discipline.

CORE SKILLS

Languages: Kotlin 2.2+, Java, JavaScript, SQL, Python

Cross-Platform: Kotlin Multiplatform (KMP), Compose Multiplatform (iOS stable, Desktop, Web Beta), Compose Hot Reload, React Native

Async & Reactive: Kotlin Coroutines, Flow, StateFlow, SharedFlow

DI & Tooling: Hilt, Dagger 2, Koin, Gradle KTS, Version Catalogs, KSP

Testing & Quality: JUnit, MockK, Espresso, Compose UI Tests, CMP UI Testing v2, Turbine, LeakCanary, Detekt, ktlint

AI-Assisted Dev: Claude, Cursor, GitHub Copilot, Junie, local LLMs, prompt-driven refactoring, AI code review, test scaffolding

Android: Android SDK, Jetpack Compose, Navigation 3, Material 3, Material Expressive, ViewModel, DataStore, Room, WorkManager, Paging 3, CameraX

Architecture: MVI, MVVM, Clean Architecture, Modularization, Unidirectional Data Flow, Repository Pattern, SOLID, Dependency Injection

Networking & Data: Retrofit, OkHttp, Ktor, REST, GraphQL, Kotlinx Serialization, Room, Realm, Firebase

Security: VPN protocols, EncryptedSharedPreferences, Biometric APIs, OAuth2, SSL Pinning, Secure Auth Flows

CI/CD & Release: GitHub Actions, Jenkins, Play Console, Firebase App Distribution, Crashlytics

Tools: Git, GitHub, Bitbucket, Jira, Confluence, Figma, Postman, Android Studio

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2025 - Present

Gen Digital (Norton & Avast) · Chennai, India

- Ship VPN and security features for Norton VPN, Avast VPN, and Norton 360 Security, serving 50M+ global consumers on Android.
- Build reactive UI with Jetpack Compose and Kotlin Coroutines/Flow, aligning to Clean Architecture and modular Gradle setup for faster feature delivery.
- Harden auth, kill-switch, and connection flows; reduce VPN handshake failures and improve crash-free sessions through targeted debugging and telemetry.
- Built an offline-ready server-location map that stays usable without a connection, and owned VPN notification management — connection status, alerts, and kill-switch notifications.
- Drive AI-first workflows using local LLMs and Copilot for code review, refactoring, unit test scaffolding, and documentation, cutting routine engineering time by ~30%.
- Partner with QA, product, design, and platform teams to deliver on-time releases through GitHub Actions CI, code reviews, and Play Console rollout monitoring.

Engineer - Mobile Banking

May 2023 - Dec 2024

Temenos Pvt Ltd · Chennai, India

- Delivered banking features across Android and iOS using Kotlin Multiplatform (KMP) and Compose Multiplatform, sharing 70%+ business logic across platforms.
- Implemented secure login, biometric auth, push notifications, and account integration flows for regulated banking clients.
- Built UI with Temenos Visualizer and integrated backend services via Quantum Fabric, plus REST APIs, reducing integration turnaround for new client onboarding.
- Supported production incidents with root-cause analysis, hotfix delivery, and release documentation for enterprise banking rollouts.

Senior Software Engineer

Nov 2022 - Apr 2023

Vitalic Health Pvt Ltd · Chennai, India

- Revamped business-critical modules of a prescription and OTC medicine Android app in Kotlin and Java, improving app stability and checkout reliability.
- Refactored network layer to Retrofit + Coroutines, reducing API failure rate and improving cold-start performance.
- Built reusable UI libraries and led peer code reviews to raise code quality and shorten PR merge time.

Software Engineer

Jun 2022 - Nov 2022

GlobalLogic Pvt Ltd · Chennai, India

- Contributed to a React Native app and embedded WebView flows for a global digital transformation client.
- Debugged native bridge issues and coordinated cross-timezone delivery with distributed engineering teams.

Software Developer - Android

Jan 2021 - Jun 2022

Sulekha Pvt Ltd · Chennai, India

- Shipped Android features for Sulekha, a local services marketplace with 10M+ downloads and 4.3★ Play Store rating.
- Integrated Google Maps SDK and Firebase Cloud Messaging to power location-based discovery and re-engagement notifications.
- Built custom views and reusable libraries, including a screen-sharing onboarding flow that reduced customer drop-off during pandemic-era remote signups.
- Mentored 3 junior Android developers on Kotlin, MVVM, and Git workflows; owned code reviews and coding standards for the Android squad.

Android Developer

Sep 2019 - Dec 2020

VASS Software's & Solutions · Chennai, India

- Built the VGM Patient Android app from scratch, covering EHR, ICD-code diagnosis, prescriptions, appointments, and medical history workflows.
- Integrated REST APIs and custom Android UI to streamline patient and hospital record management.
- Delivered backend APIs in PHP CodeIgniter with MySQL, owning full-stack feature delivery end-to-end.

KEY PROJECTS

Norton VPN & Avast VPN (Gen Digital): Android VPN client work on connection, kill-switch, and auth flows, plus an offline-ready server-location map and VPN notification management, using Kotlin, Compose, and Coroutines.

Norton 360 Security: Consumer security features across scan, protection, and settings surfaces with modular Gradle architecture.

Temenos Mobile Banking: KMP + Compose Multiplatform banking flows with biometric auth, push notifications, and Quantum Fabric integrations.

Sulekha Marketplace (10M+ downloads): Maps, FCM, custom views, and screen-share onboarding for local services discovery.

VGM Patient (Healthcare): End-to-end Android + PHP/MySQL EHR app with ICD diagnosis, prescriptions, and appointments.

EDUCATION

Master of Computer Applications (MCA)

University of Madras · 2019 - 2021

Bachelor of Computer Applications (BCA)

Patrician College of Arts & Science · 2016 - 2019
